Price Status - Final

Node:	Month-to-date	7-day Avg	Daily Avg
Benmore	\$102.37	\$33.56	\$144.04
Haywards	\$105.86	\$34.33	\$149.73
Ōtāhuhu	\$111.55	\$36.20	\$157.70

Day	Night	Price Range
\$147.54	\$133.55	\$20.07 - \$366.53
\$154.68	\$134.91	\$20.81 - \$388.26
\$165.75	\$133.54	\$22.20 - \$413.00

Note: For the purposes of this chart, PRSS indicates periods where PRSS was used.

HVDC Flow and Reserve Prices

Generation Summary

Percentage of Renewable Generation

Thermal Generation

Station	Ave MW	Range (MW)
Huntly	158	100 - 240
TCC	0	0 - 0
e3p	0	0 - 0
Huntly p40	30	0 - 45
Whirinaki	0	0 - 0
Stratford Peaker	0	0 - 3
McKee Peaker	0	0 - 0
Junction Rd	36	0 - 96

Hydro	Ave MW	Range (MW)
Waikato	793	582 - 962
Tongariro	133	40 - 239
Waitaki	715	265 - 1179
Takapō	138	70 - 175
Clutha	678	523 - 744
Manapōuri	744	744 - 744
Wind Farms	237	47 - 456

Wind Farms includes: Te Uku, West Wind, Te Āpiti, Tararua, White Hills, Waipipi, Mill Creek, Te Rere Hau, and Harapaki.

Renewable Generation

Note: For the purposes of this chart, renewable generation is all hydro, geothermal, wind and grid scale solar. Co-generation is counted as thermal generation even though the carbon may be attributed to other industries.

Wind Generation

Daily Average: 12 Sep to 2 Oct

Generation for: Thursday, 2 October 2025

Solar Generation

Daily Average: 12 Sep to 2 Oct

Generation for: Thursday, 2 October 2025

Battery Generation

Generation for: Thursday, 2 October 2025

Note: OTA price is indicative and for reference only and does not reflect the price paid or received by the batteries. Powerflow and constraints may result in a price at the batteries that is dramatically different from the reference node.

Note: South Island Demand, South Island Cumulative Difference, and New Zealand Cumulative Difference are exclusive of Tiwai Point Demand.

Note: emsTradepoint prices and indices are inclusive of the cost of carbon.

Summarised Generation Offers

The chart above shows the quantities of generation offered into the market by individual generators, between pre-defined offer

\$400 - \$20,000	— Offer band <\$20,000
\$300 - \$400	 Offer band <\$400
\$200 - \$300	—x— Offer band <\$300
\$150 - \$200	--- Offer band <\$200
\$100 - \$150	—+— Offer band <\$150
\$50 - \$100	 Offer band <\$100
\$10 - \$50	—*— Offer band <\$50
\$0 - \$10	--- Offer band <\$10

The region below each offer band contains all the generation offer quantities between the two prices (identified as various black lines), displayed as a generator total (regardless of station). The order of the generators within each offer band is the same and does not represent offer stack order, e.g. if viewed within an offer band, Contact being above Mercury does not mean that Contact's offers were higher than Mercury's.

NZ Generation has been used to represent demand so that losses can be taken into account, however it is not total generation as not all embedded or wind generation data is available, also marginal losses and lines constraints are not represented. Therefore the NZ Generation line will not necessarily represent the price.

NZ Generation (red line) and the Haywards price (blue line) are plotted on the chart to assist in interpretation. The price on the second axis relates to the blue 'Haywards Price' line only.
