Price Status - Final

Node:	Month-to-date	7-day Avg	Daily Avg
Benmore	\$78.18	\$61.26	<b>\$67.80</b>
Haywards	\$83.96	\$65.55	<b>\$69.48</b>
Ōtāhuhu	\$95.50	\$73.78	<b>\$76.53</b>

Day	Night	Price Range
\$62.19	\$84.63	\$20.27 - \$96.33
\$64.08	\$85.68	\$20.93 - \$98.98
\$71.36	\$92.04	\$23.38 - \$107.33

Note: For the purposes of this chart, PRSS indicates periods where PRSS was used.

Station	Ave MW	Range (MW)
Huntly	87	0 - 197
TCC	0	0 - 0
e3p	0	0 - 0
Huntly p40	0	0 - 0
Whirinaki	0	0 - 0
Stratford Peaker	0	0 - 0
McKee Peaker	14	0 - 44
Junction Rd	68	47 - 96

Hydro	Ave MW	Range (MW)
Waikato	636	406 - 940
Tongariro	109	65 - 231
Waitaki	443	265 - 790
Takapō	169	148 - 177
Clutha	608	383 - 718
Manapōuri	634	425 - 744
Wind Farms	623	436 - 754

Wind Farms includes: Te Uku, West Wind, Te Āpiti, Tararuas, White Hills, Waipipi, Mill Creek, Te Rere Hau, and Harapaki.

Note: For the purposes of this chart, renewable generation is all hydro, geothermal, wind and grid scale solar. Co-generation is counted as thermal generation even though the carbon may be attributed to other industries. Landfill gas generation data is provided by WM for Redvale, Whitford, Tirohia, and Kate Valley Landfills.

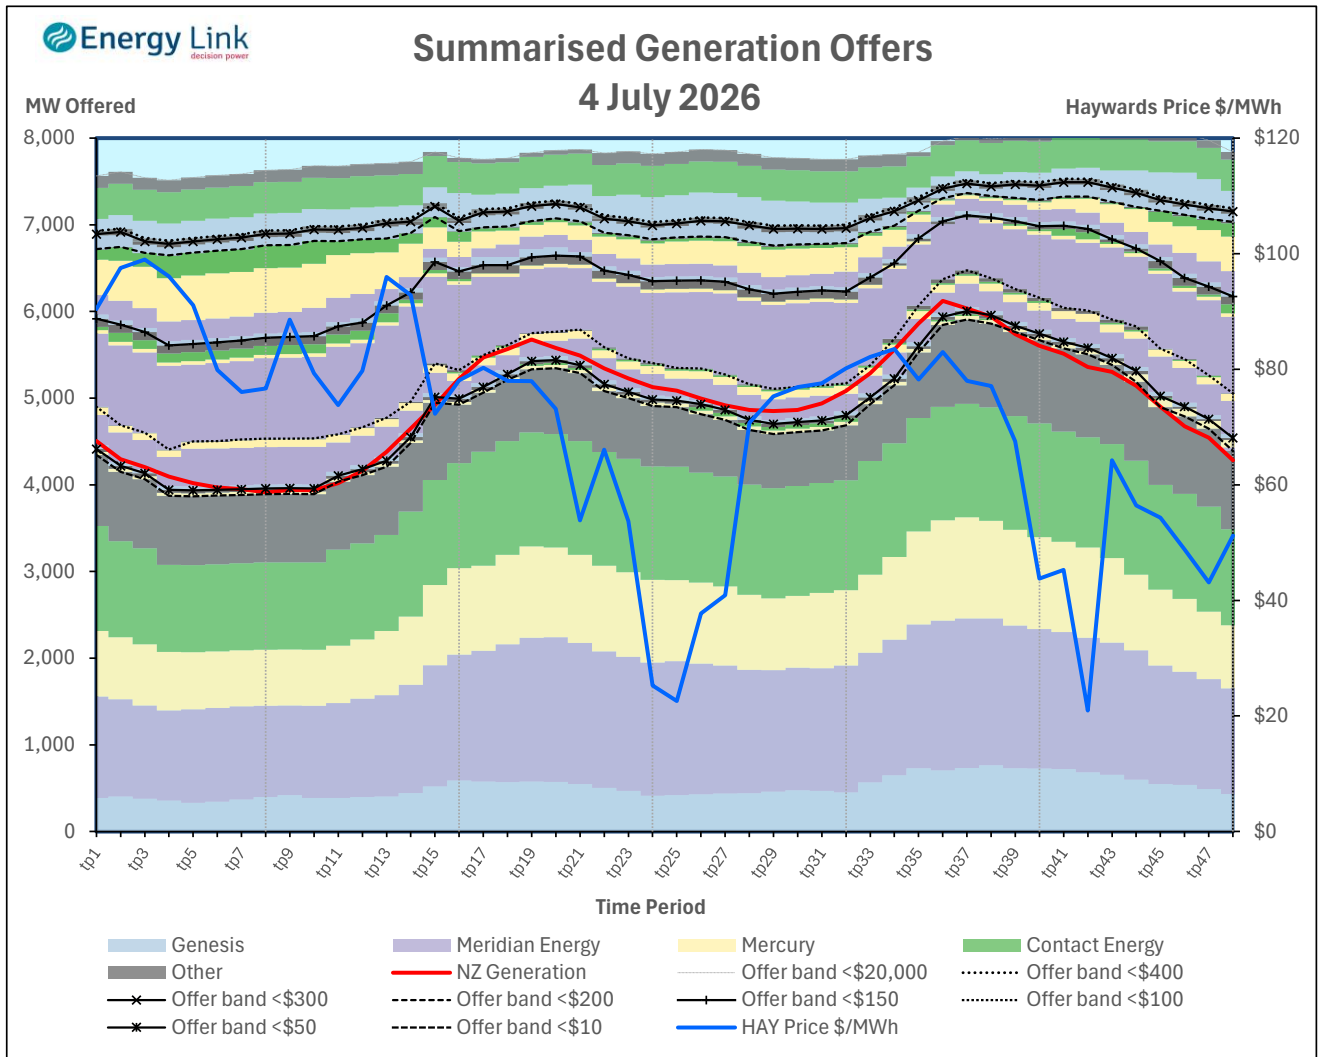

Note: South Island Demand, South Island Cumulative Difference, and New Zealand Cumulative Difference are exclusive of Tiwai Point Demand.

Note: emsTradepoint prices and indices are inclusive of the cost of carbon.

**Summarised Generation Offers**

The chart above shows the quantities of generation offered into the market by individual generators, between pre-defined offer bands.

<b>\$400 - \$20,000</b>	— Offer band <\$20,000
<b>\$300 - \$400</b>	..... Offer band <\$400
<b>\$200 - \$300</b>	-x- Offer band <\$300
<b>\$150 - \$200</b>	- - - Offer band <\$200
<b>\$100 - \$150</b>	- + - Offer band <\$150
<b>\$50 - \$100</b>	..... Offer band <\$100
<b>\$10 - \$50</b>	- * - Offer band <\$50
<b>\$0 - \$10</b>	- - - Offer band <\$10

The region below each offer band contains all the generation offer quantities between the two prices (identified as various black lines), displayed as a generator total (regardless of station). The order of the generators within each offerband is the same and does not represent offer stack order, e.g if viewed within an offer band, Contact being above Mercury does not mean that Contact's offers were higher than Mercury's.

NZ Generation has been used to represent demand so that losses can be taken into account, however it is not total generation as not all embedded or wind generation data is available, also marginal losses and lines constraints are not represented. Therefore the NZ Generation line will not necessarily represent the price.

NZ Generation (red line) and the Haywards price (blue line) are plotted on the chart to assist in interpretation. The price on the second axis relates to the blue 'Haywards Price' line only.
